

## TECHNICAL DATA

# ZYROBOND® CA 9112 Cyanoacrylate Remover

CA 9112 is especially developed for loosening and removing fresh and cured cyanoacrylate adhesive from solvent-resistant surfaces.

CA 9112 is suitable for cleaning dosing equipment and tools.

### APPLICATIONS:

- Loosens cyanoacrylates and many other adhesive types.
- Can be used for removing lacquers, resins and fats.
- Plastics or coated surfaces should be checked for suitability before use

### Typical Properties:

Chemical Base:	Organic
Colour:	Clear, Amber
Viscosity:	1 cps @ 20°C
Evaporation Time:	<30 sec. @ 20°C
Opening Time:	2 hours

### Instructions for use:

#### Fresh adhesive residue removal:

Apply product, leave to penetrate and wipe off with a cloth.

#### Removal of cured adhesive residues:

Apply product, leave to penetrate until the adhesive has a slightly sticky texture, then wipe off the dissolved adhesive with a cloth. For thick adhesive residues, this process must be repeated several times.

#### Cleaning of contaminated parts:

Fill the product into a suitable container (e.g.: glass), soak the parts to be cleaned long enough to allow the adhesive residue to dissolve. The residue can then be removed by wiping with a cloth or brush.

**Tip:** Adhesive residue on your fingers can be removed as follows: a) by washing with soap and hot water or b.) by applying baby oil or vegetable oil. (The oil slowly infiltrates the contact point of bonding).

**Safety Information:** The rules apply to the use of this product for flammable substances, as well as the corresponding local regulations. The solvent can damage certain plastics and coatings. The user is advised to check the compatibility with your material.

**General information:** The information contained herein serves merely as an indication and is given to the best of knowledge. The users must test the suitability of the product for her/its/their respective application independently however.
